

# Can You Zoom Out on TikTok?

- Allows users to zoom in and out of videos by pinching the screen.
- Only works for videos in specific aspect ratios like 9:16 or 1:1.

## What is the TikTok Flash Trend?

- Viral trend urging users to "zoom out" or "save to zoom out" on videos.
- Videos typically show only upper body with a caption implying more content if zoomed out.
- Dubbed "flash trend" as users may flash explicit content upon zooming out.

## Why the TikTok Flash Trend is Deceptive:

- Videos are uploaded in aspect ratios where the zoom out feature doesn't work.
- Intended to mislead viewers or solicit engagement for the poster.
- Can expose users to inappropriate content or scams.

## Tips to Avoid Falling for the Trend:

- Check the aspect ratio of the video for compatibility with the zoom out feature.
- Verify the source of the video and consider the credibility of the user.
- Pay attention to captions and comments for warning signs of the flash trend.
- Report and block videos that are part of the flash trend to prevent further spread.
